

Krix Quadflex Speaker Cable

Product Specifications.

Krix Quadflex Speaker Cable.

Krix Quadflex Speaker Cable Description.

The speaker cable used between your power amplifiers and your speakers plays a clearly audible role in your home theatre and home multi-room audio system.

Krix designed its own Quadflex speaker cable to perform at a level matching the high standards Krix places on all of its other products.

Krix Quadflex speaker cable also features an internal sleeve layer for flexible conduit or wall installation.

Krix Quadflex Speaker Cable

Product Specifications.

Krix Quadflex speaker cable features two easily identifiable coloured pairs (ie. four conductors) that may be used:

- a) separately as two pairs for bi-wired/bi-amped speakers in short lengths, or
- b) together with the two pairs wired in parallel to comprise a parallel wired configuration for optimal performance and low loss power transfer.

When the two Krix Quadflex pairs are wired in parallel, they effectively form a 2 * 2.08mm² (14 gauge AWG) = 4.16mm² (11 gauge AWG) speaker cable.

Krix Stratospherix Outdoor In-Ceiling Speaker Specifications.

Resistance

Single pair: 1.848 Ohm / 100m length

Both pairs in parallel: 0.924 Ohm / 100m length

Capacitance

Single pair: 6.2nF / 100m

Both pairs in parallel: 13.6nF / 100m

Inductance

Single pair: 76.4nH / 100m

Both pairs in parallel: 41.7nH / 100m
